

# Physical Education

In Physical Education we attempt to develop our students' understanding of the global concept of sport. We look at sport from different angles: how your body works, how you learn skills, what motivates people to participate, and how sport affects and reflects society. Your physical abilities will be tested and will form part of your result. Other skills will also be developed in terms of your communication, leadership and analytical capabilities. We visit Bath University to look at physiological testing and develop an understanding of human physiology in action.

## WHERE TO NEXT?

A career in sport such as coaching, sports science, analysis and teaching. Former students have gone on to university to study sports science, physiotherapy and sports therapy.
